
Supplementary Fig. 5. Subgroup analysis—total hemorrhagic burden (THB) composite versus 1-year stroke recurrence. Two-panel forest plot of adjusted hazard ratios per 1 standard deviation (SD) of the THB composite for any stroke recurrence (gray, left panel) and hemorrhagic stroke recurrence (orange, right panel), stratified by the same pre-specified subgroups. Models were adjusted for age, National Institutes of Health Stroke Scale (NIHSS), and atrial fibrillation. Event counts for any/hemorrhagic recurrence per subgroup are shown in parentheses. SWI, susceptibility-weighted imaging; TOAST, Trial of ORG 10172 in Acute Stroke Treatment; LAA, large-artery atherosclerosis; SVO, small-vessel occlusion; CE, cardioembolism; AF, atrial fibrillation; HR, hazard ratio.
