Supplementary Table 13. cSS volume dose-response within cSS-positive patients

Analysis	Number	Poor events	log(cSS volume) OR (95% CI)	*P*-value
Within cSS-positive patients (volume dose-response)	209	83	1.09 (0.58–2.03)	0.79

Logistic model for 3-month poor outcome restricted to cSS-positive patients, adjusted for the same clinical covariates; OR is per 1 log mL of cSS volume.
cSS, cortical superficial siderosis; OR, odds ratio.
