Supplementary Table 4. Three-month outcome by THB tier (95% Wilson CIs)

THB tier	Number	Poor outcome (n)	Poor outcome, % (95% CI)	Mortality (n)	Mortality, % (95% CI)
T0	2,808	523	18.6 (17.2–20.1)	67	2.4 (1.9–3.0)
T1	1,211	295	24.4 (22.0–26.9)	38	3.1 (2.3–4.3)
T2	1,096	329	30.0 (27.4–32.8)	39	3.6 (2.6–4.8)
T3	1,009	371	36.8 (33.8–39.8)	61	6.0 (4.7–7.7)

T0, no burden on any of the three components; T1–T3, tertiles of the THB composite among burden-positive patients. Percentages are within-tier rates with 95% Wilson CIs. Trend across tiers by the Cochran-Armitage test (poor outcome $P<0.001$; mortality $P<0.001$).
THB, total hemorrhagic burden.
